OBJECTIVE

Passionate Computer Engineering student focused on cybersecurity, AI, and software development, seeking an internship to learn, innovate, and contribute in a dynamic, real-world environment.

EDUCATION

German University in Cairo, Bachelor of Computer Engineering

2022 - 2027

SKILLS

Programming

Python, Java, C++, javafx, ASP.Net, Haskell, Prolog

Cybersecurity

Network Security, Sandbox (DDAN), Apex One

Languages

English - Fluent, German - Good, French - Good,

Web Development

Node.js, REST APIs, SQL, React

Productivity Tools

Microsoft SharePoint, Microsoft Office, Excel, PowerPoint, Word, Outlook

Virtualization and System Deployment

Windows Server, VMware

EXPERIENCE

IT/Cyber Security Engineer Intern

Aug 2024

First Abu Dhabi Bank Group (FAB)

Cairo, Egypt

- Gained hands-on experience in network traffic monitoring, threat detection, incident reporting, and the use of cybersecurity tools such as Deep Security Manager, APex central, and IDS/IPS.
- Conducted web and network security assessments, identifying vulnerabilities and enhancing security measures.
- Recognized as one of the top performers in the internship program.

PROJECTS

Attack On Titans Game

2024

Attack on Titan: Utopia – A one-player endless tower defense game inspired by the Attack on Titan anime. Players defend the Utopia District walls from waves of titans by deploying anti-titan weapons across multiple battle lanes, each with dynamic enemy behavior, resource management, and escalating threat levels.

Skills: BackEnd using java,FrontEnd using JavaFx

Digital Piano Noise Cancellation Project

2024

Developed a Python-based piano simulation that generated musical tones using signal synthesis. Enhanced the project with a frequency-domain noise cancellation feature to remove added background noise, showcasing skills in signal processing, FFT, and real-time audio handling.

Skills:I used Python for implementing the project

Telecom Customer Data Management System

2024

Designed and implemented a database system for managing customer profiles, service plans, usage data, payments, and support tickets for a telecom provider. Enabled seamless account creation, efficient data retrieval, and personalized digital service experiences to improve customer satisfaction and operational efficiency.

Skills: Backend:SQL ,FrontEnd:ASP.Net

Smart Study Desk (FPGA Project)

2024

Developed a smart study desk using VHDL and FPGA, integrating sensors to detect user presence, control lighting based on ambient conditions, and automate drawer access. Tracked and displayed study duration on a 7-segment display. Simulated the system using ModelSim and implemented the design on hardware for real-time demonstration.

Skills: Modelsim for simulation , VHDL for implementation

Travel Website (Client-Server Web App)

2024

Built a full-stack travel web application using Node.js, Express, EJS, and MongoDB. Implemented user authentication, account creation, destination browsing, a personalized “want-to-go” list, and real-time search functionality. Designed with a client-server architecture to enhance user experience and session management.

Skills: MongoDB, Node.js

Internship Management System (Frontend Prototype)

2025

Designed and developed a web-based UI prototype using React and JavaScript to streamline internship application, enrollment, and evaluation processes. Focused on UI/UX best practices, intuitive navigation, and responsive design, delivering a user-centered interface based on product manager feedback and project requirements.

Skills: React, javascript

EXTRA-CURRICULAR ACTIVITIES

Powerlifting

Feb 2025

Championships

Cairo, Egypt

- First Place in Full Power WPC world cup 2025.
- First Place in Universities Deadlift Championship 2023-2025 .
